Extraction wall
for Dust and Fume Filtration

Zincocar DF

Zincocar DF 1,5-2-2,5-3-4-5-6

Design

Extraction wall with high-performance horizontal cartridges for suction and filtration of dust from sanding and processing of wood, stone, marble, plaster, inert materials, surface finishing, welding fumes.

Zincocar DF

7 Models

AFON silencer

Reduces the noise level

Pneumatic cleaning system

With compressed air

Drawer

Dust collection

Filter cartridge
Ø325/4PS1-H700-M
CEL-213 g/m²

High efficiency cartridges provide dust filtration

Non-return flap

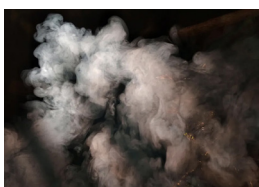

Detail of the suction slot with internal flap that remains shut during pneumatic cleaning of the cartridges to prevent leaks

Highlights

- **Plug and play:** quick installation and immediate commissioning
- **Simple maintenance** thanks to easily accessible horizontal cartridges
- **Easy to change the position** according to production needs
- **Maximum filtration efficiency**
- **Ideal for air-conditioned work areas:** avoids energy waste by reducing heating or conditioning
- **Simple dust collection** thanks to easily removable containers
- **Afon silencer** for low **noise level**

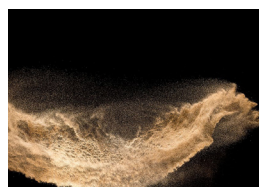

Applications

Welding fumes

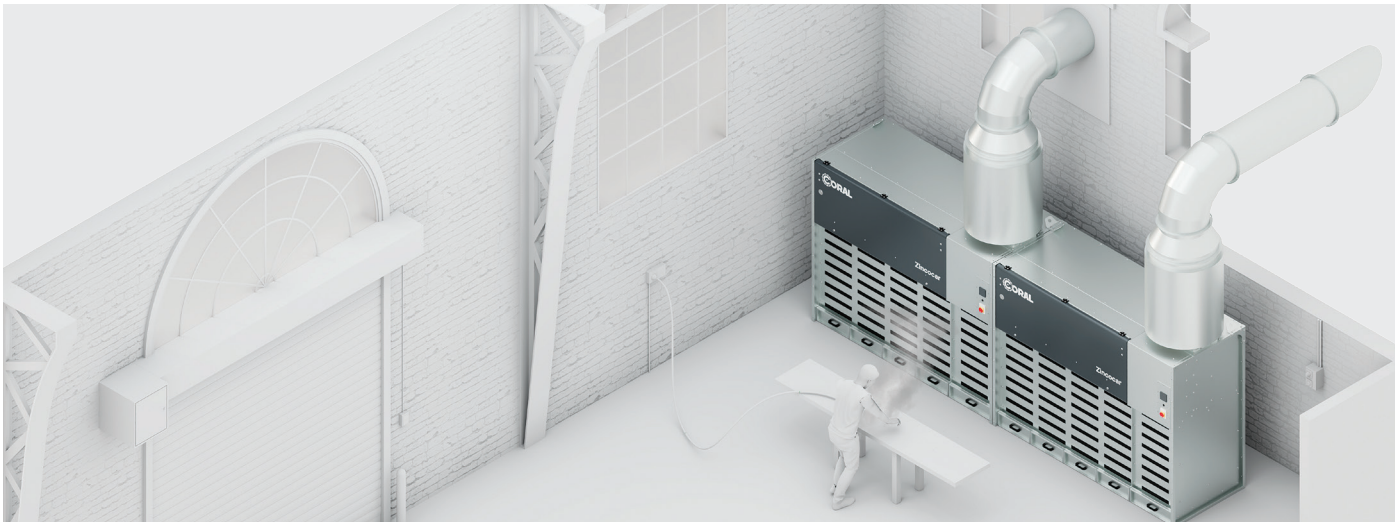

Powders

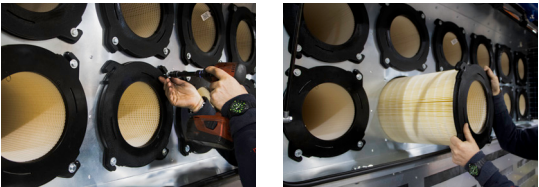

Wood dusts

Clean air solutions

The **Zincocar DF** extraction wall is an ideal solution for air purification in working environments where local extraction or piping installation is complex or unfeasible. It is especially useful in air-conditioned environments, avoiding energy waste associated with the exhausting of treated air. It is suitable for processes with variable pollution sources and is effective when mobile units or centralised systems do not guarantee adequate filtration.

Easy access, quick and simple maintenance

The horizontal arrangement of the cartridges allows easy access and fast maintenance of the filtering section.

Filter Media

Principle of operation

The extraction walls are built entirely of sturdy sheet metal panels. Through the soundproofing centrifugal extractor, a vacuum is created that determines the forced circulation of an air flow that conveys dust through high-efficiency cartridge filters (99.9%) without harmful diffusion into the environment. The air, perfectly filtered, is exhausted by the centrifugal extractor whose characteristics are such as to guarantee a suction speed on the wall that complies with current regulations. All **Zincocar DF** extraction walls are supplied with a cyclic programmer for cleaning the filter cartridges automatically with compressed air.

Zincocar DF

- ① Dusty air inlet
- ①a Anti-return flap
- ② Dust collection drawer
- ③ Horizontal filter cartridge
- ④ Fan
- ⑤ Compressed air tank
- ⑥ Afon silencer
- ⑦ Filtered air outlet
- ⑧ Cyclic programmer ON/OFF switch

Product range

Zincocar DF

Equipped with IFA/BGIA M-CEL horizontal cartridges, it provides effective extraction and filtration of dust sanding and processing wood, stone, marble, plaster, inert materials, surface finishing, and welding fumes.

Complete with an automatic cleaning system, it ensures optimal performance and simplified maintenance.

Made in Coral

Coral manufactures 100% of all the components that are part of an industrial extraction system within their facilities in Volpiano, just outside of Turin. The quality of materials that we use and our industry experience guarantee a production of high level in everything we make.
